

## The Manor House Hotel and Conference Centre

**In a bid to increase energy efficiency and reduce costs, the recently refurbished The Manor House Hotel and Conference Centre in Godalming, Surrey, turned to Click Scolmore to supply the very latest in energy saving lighting products.**

The company's award-winning Flameguard and Energetic lamps have provided eco-friendly lighting solutions throughout the hotel and conference centre which includes 31 bedrooms and 11 meeting rooms.

By replacing the existing lighting with a variety of low energy alternatives it has been possible to save on the wattage used and therefore the running costs involved. An example of the savings achievable is demonstrated by the use of Click Energetic LED 6W lamps to replace the original 50w and 150w

ones used in the Bistro, Smith Bar & Lounge and all 31 bedrooms. This has seen a reduction in the wattage used plummet from 1500 to 192 - an overall saving of 1308 watts.

Comments Jeyson Fosbury, Facilities Manager at The Manor House,

“Through Rexel Senate Electrical we have sourced the most energy efficient lamp replacements possible with the Click Scolmore's Energetic range. We have been able to replace 75% of all existing lamps with low energy options without compromising on style, size or light output. The significantly lower energy usage that has been achieved has certainly boosted our green credentials and is saving us money in the long term. This is also supporting our goal to achieve a 'Gold' in the Green Tourism Awards.”
