

Scolmore goes back to school

Due for completion in September 2014 is the brand new St David's student accommodation in Swansea and an array of Scolmore Group's wiring accessories and lighting products are being installed ready for the new intake of university undergraduates.

Located in the centre of town, the new accommodation is made up of 382 en suite bedrooms and studios, with a kitchen and communal area

for every four bedrooms. Switches and sockets from Scolmore's Mode wiring accessory range, and low energy downlights have been specified throughout the bedrooms, kitchens and communal areas, while the company's emergency exit signs have been used in the kitchens and corridors. The requirement for low energy external lighting has been met with LED bulkheads and bollards from the Fumagalli outdoor lighting collection.
