

Type A & C USB Sockets

Explore our range of 1 & 2 Gang Type A & C USB Sockets.
Available throughout our Click Wiring Accessory ranges.

EXPERIENCE THE
CONVENIENCE OF BOTH USB
TYPE A AND TYPE C PORTS IN
A RANGE OF SLEEK SOCKETS,
REDEFINING CONNECTIVITY
FOR MODERN SPACES.

TYPE C USB (5V DC, 3A MAX)

Type C USB is the connector of the future and is already available on a number of devices. Type C USB is small and discrete. Type C USB is reversible and can be plugged in either upwards or downwards with no risk of damage.

TYPE A USB (5V DC, 3A MAX)

The USB Type A connector is one of the earliest and most recognizable USB connectors. It has been the standard USB port on computers and laptops for many years. It's designed to connect various peripherals and devices to a host device.

**When both USB Ports are in use on 1 gang sockets, the 4A charge is shared. The intelligent chip inside the USB PCB adjusts the output according to the load connection.*

3 PIN SAFETY SHUTTER SOCKETS

The Safety Shutters contained within our new 1 & 2 Gang Socket Outlets with integrated Type A & Type C USB offer increased security and reassurance. All three pins of a UK BS Standard Plug must be inserted to release the locking mechanism to allow the safety shutters to open.

The Safety Shutters are designed to exceed BS 1363 requirements in which a standard BS 1363 Shutter only requires an engaging earth pin to open the shutter.

PRODUCT CODE STRUCTURE

When ordering any of our 1 & 2 Gang Type A & C USB sockets please use the following code structure:

* Grey inserts are only available with Satin Chrome, Brushed Stainless Steel and Stainless Steel finishes in the Deco, Deco Plus and Definity Complete ranges. Antique Brass, Black Nickel, Matt Black and Black finishes are only available with black inserts.
