Additional Information

For cleaning / polishing of products, use only a soft, dry, clean cloth.
Ensure that the mains supply is isolated before commencing installation and refer to the circuit diagram with the relevant product.
Bare earth cables must always be covered with appropriate sleeving and wired to the earth terminal.
The safety shutter will only fully open when all three BS 1363 plug-top pins engage correctly with the shutter. Inserting the earth pin alone will not open the live and neutral shutter like conventional socket shutters.
